## PROFILE

**Front-End Engineer | 3+ Years Experience | Vue 3, Nuxt, React, Next.js, TypeScript**  
building enterprise dashboards, real-time monitoring interfaces, and crypto payment flows. Focused on shipping high-quality, accessible UX that advances business goals in fast-moving teams, with deep experience in Arabic RTL interfaces.

## PROFESSIONAL EXPERIENCE

**Frontend Developer, Wakeb Data** Jan 2026 – Present

**Technologies:** Vue 3, TypeScript, Vuetify, Tailwind CSS, Laravel, WebSockets

- Developed and maintained 13+ production web applications across legal, recruitment, and surveillance domains (Vue 3, TypeScript, Vuetify) **within a configurable white-label platform.**
- Built advanced operations dashboards — live HLS/WebRTC video, License Plate Recognition (LPR), **drone & GPS tracking, real-time maps**, and complex Arabic RTL data interfaces.
- Engineered **reusable RTL-compliant Vuetify components** (data tables, dropdowns, tooltips) with viewport-aware positioning, integrated over REST APIs and **Laravel Echo / Reverb WebSockets** for real-time monitoring.

**Frontend Developer at Dafa Company, (Rox – Cryptocurrency Trading Platform)** Jun 2024 – Jan 2026

**Technologies:** Vue 3, TypeScript, PrimeVue, Tailwind CSS, Firebase

- Built 5+ trading features boosting platform responsiveness by 30% on Bitcoin/crypto exchange platform using Vue.js 3, TypeScript, PrimeVue, and Tailwind CSS
- Integrated Firebase real-time database with SSE and FCM for live metrics, push notifications, and user engagement
- Developed multi-wallet support (MetaMask, Coinbase, Phantom) via EIP-6963 for EVM and Solana networks
- Created Vault payment module enabling third-party users to trade crypto assets with multi-currency support and USD conversion
- Optimized performance with virtualized infinite scrolling, reducing rendering time by 40% and cloud storage integrations (AWS S3, Dropbox, Drive)

**Frontend Developer, Uniparticle** Jun 2023 – Jun 2024

**Technologies:** Vue 3, Vue 2, Tailwind CSS

- Maintained Online Professional Development (OPD) platform for Discovery Education using Vue.js and JavaScript
- Redesigned dashboard and task review system with complete user flow improvements
- Built accessible educational applications with screen reader support, keyboard navigation, and WCAG compliance
- Implemented internationalization (i18n) and multi-language support for educational content
- Developed Seven website using Nuxt.js 3 with responsive design, "https://seven.eg "

**Project: Mesbaar – Candidate Assessment Platform, Freelance** Aug 2025 – Sep 2025

**Technologies:** React, TypeScript, Tailwind CSS, Zustand, Radix UI, Turborepo, Webpack.

- Built assessment platform with 165+ evaluation questions using React, TypeScript, Tailwind CSS, and Zustand
- Implemented real-time session management with heartbeat monitoring, progress tracking, and automatic timeouts
- Developed monorepo architecture using Turborepo with 10+ reusable UI components using Radix UI
- Added multilingual support (English/Arabic) with i18n infrastructure and RTL layout
- Integrated JWT authentication, session authorization, and secure password reset workflows
- Enhanced performance through code splitting, lazy loading, and Webpack optimizations

**Frontend Developer, Freelance, Prosoft** Apr 2025 – Jun 2025

**Technologies:** Next.js 15, Tailwind CSS, GSAP, Framer Motion, shadcn/ui

- Built marketing website using Next.js 15, Tailwind CSS, shadcn/ui, GSAP, and Framer Motion

## SKILLS

- Frontend: Vue.js, Nuxt, React, Next.js, TypeScript, JavaScript, HTML5, CSS3, SASS
- State: Pinia, Vuex, Redux, Zustand
- UI: Tailwind CSS, PrimeVue, Vuetify, Bootstrap, shadcn/ui, Radix UI
- Realtime/Data: Firebase (FCM, RTDB), SSE/WebSockets, REST
- Tooling: ESLint, Prettier, Turborepo, GitHub, Bitbucket, Jira , Vite
- Quality: Accessibility (WCAG), i18n/RTL

## EDUCATION

**Bachelor's Degree, Pyramids higher institute** 2014 – 2019  
BSc in Civil Engineering - General Grade: B+ (Very Good).
